PRODUCT CATALOGUE

Edition 24

Hardware designed
for homes since 1984.

Windsor ARCHITECTURAL HARDWARE

IT STARTED WITH A PULL HANDLE

In 1984, Peter Hickmott went looking for a handle for his front door and came up short. A fitter and turner by trade who machined parts for jet boats, he decided to make one himself — one that was engineered to work properly, feel good in the hand and wear in, not out. That set the standard we've held for over 40 years.

The first Windsor products were made in his garage, at night and early in the morning, on a lathe borrowed from a friend. Cabinet knobs to begin with, then handles, then all the other hardware a home needs.

Our first signature finish came out of months of experimenting in 20L buckets — knobs hung from a broom handle slung between two dining chairs, curing in the living room. We still finish everything by hand.

Plenty has changed since. One man became a team, a garage became a workshop, and Windsor is now in homes on both sides of the Tasman.

These days, Windsor is still run by the family who started it, alongside a team that has carried it just as long. What has been passed down isn't just the business, it's the same eye for the details that make a home and the same insistence on getting them right.

40 years on, the same focus: hardware designed for homes.

INSTINCT TO IMPROVE

The handle Peter made for his own front door is still in the range today. So is the joinery knob that followed it, both to the original 1984 designs.

The same instinct runs through everything since. Find what could be better, then work at it until it is.

Fitting a handle set used to mean three separate holes. In 2019 we got it to one. rapidFIT goes through a single 48mm hole, boss and spindle assembled to one half, two screws for the other. Once the latch and striker are in, the handle is on in under a minute. Half an hour back across a houselot. The boss grips the latch inside the door, so the rose stays where the builder put it.

The Futura and Galaxy roses have since been reworked from the inside. A wider bearing surface holds the lever in alignment, a tighter tolerance keeps the assembly firm. Nobody sees it. You feel it every time you open the door.

On the LUME sliding doors, the problem was feel. The snib travels up and down to throw and withdraw the bolt, and getting that right took work. glideLOCK will run it in a cassette with a sliding channel, so nothing touches the backplate. A snib gets used twice a day for 30 years. Worth getting right.

Some work never reaches a catalogue page. Custom pieces begin as a conversation between the specifier, our sales team and our engineers, most built on platforms we already make: roses, spigots, plates, pull handle legs. A one off is held to the same standard as everything else.

It always starts the same way. Someone here picks up a part we've made for years and decides it could be better. That's how Windsor started, and it's still how the next one begins.

SIGNATURE HAND FINISHES

From our hands, to yours.

Our collection of bespoke hand finishes has been honed over four decades of perfecting its true artisan form.

They've always been a labour of love which began with dipping cabinet knobs in 20 litre buckets in the backyard to apply a lacquer and curing them in the family living room.

Over time processes were refined, trends evolved and our collection grew.

Our hardware is forged and machined using the finest quality solid brass arriving at Windsor in a natural, raw state—a blank canvas ready to take on a new look.

To create the different finishes, we use a variety of metal treatments, then the finish is relieved-back by hand by our team of specialist craftspeople.

Some finishes are left in their natural state to age gracefully over time, these are our living finishes, others are coated with a resin lacquer to protect the colour and provide either a high gloss or matt finish, these are our lacquered finishes.

Door accessories, window hardware and pull handles are batch processed for precise colour coordination.

MADE
TO ORDER

Consultation
Get in touch to arrange a consultation. We work through your requirements and talk through what a Made to Order product can be for your home, or bring your vision to life.

Design Proposal Review
We develop the design with you. You have the chance to review and approve it before anything moves forward.

Material and Finish
Select from our range of materials and finishes to suit the look you have in mind.

Quotation and Approvals
Once the design is settled, you receive a detailed quote covering the costs involved. On acceptance, we confirm payment and begin.

Production
Your hardware is made to the approved design and specification. We confirm the lead time so you know when to expect it.

Quality Check
Each piece is inspected against the Windsor standards before it leaves us.

Delivery
Your finished hardware is packaged and sent to your nominated address.

Installation
Upon arrival, follow our detailed instructions for a straightforward installation.

ENTRANCE

First impressions are just as important when it comes to your front door. Make a statement with your entrance hardware and set the scene of luxury as it weaves through the rest of your home.

Sento Diamond Knurl Pull Handle - 900mm
in Brushed Nickel

SOLID BRASS

Windsor's most premium entry hardware, these solid brass pull handles are available in two distinct profiles. Straight pulls offer a clean, continuous minimal look, while offset pulls are ideal for sliding doors to provide clearance for your hand when close to the door frame.

Ideal For:
- Main entry doors
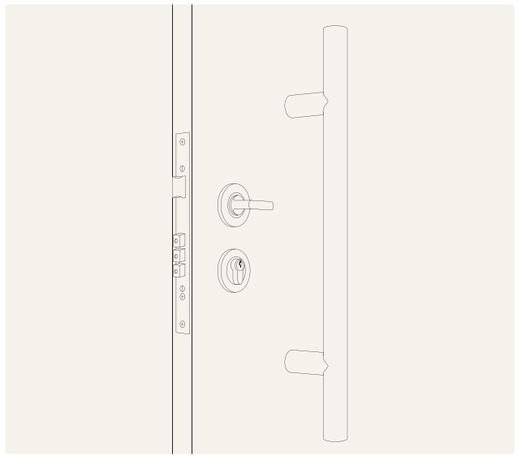
- Pivot doors
- Timber doors

Pull Handle + Deadbolt Lock Kit

Includes Pull Handles, Euro Mortice Lock, Euro Escutcheons and Key/Turn Cylinder

Ideal For:
- Main entry doors
- Pivot doors
- Timber doors

Pull Handle + Mini Lever Lock Kit



Includes Pull Handles, Euro Mortice Lock, Euro Escutcheons, Key/Turn Cylinder and Mini Levers

Ideal For:
- Main entry doors
- Multi-unit developments
- Timber or aluminium doors

CHECK THE SPECS

Technical Information

CONSTRUCTION
Solid Brass or Stainless Steel (range dependent).

CONFIGURATION
Pull handles sold as back-to-back pairs. Also available as singles with face fix or rear thru-fix door fixing.

Back-to-Back: A matching pair fixed through the door from both sides, providing a handle on each face with concealed fixings.

Face Fix: Screws mount directly onto the door face, suitable for single sided applications where rear access is not required.

Rear Fix: Bolts thread through from the back of the door for a clean front face with no visible fixings.

CUSTOM LENGTHS
Stainless Steel custom lengths up to 3,600mm available, please enquire for lead times. Note finishing options on all pull handles are limited at longer lengths.

FIXINGS
Fixings to suit both glass and timber doors included.
Sento Pull Handles supplied with M6 bolts. Milford and Kepler Pull Handles supplied with M8 bolts.

DOOR THICKNESSES
Through-bolts provided to suit most standard door thicknesses.
For ultra-thick doors, longer through-bolts are available.

USAGE
Suitable for interior and exterior applications.

ITALIAN

Everyone has their own curated collection of life’s little luxuries.

The taste of a fine wine, scent of your favourite perfume or feel of Egyptian cotton sheets.

Let the distinct touch of solid brass door handles become one of them.

Make every door you open a little more special.

Charleston Entrance Set
in Powdercoat Matt Black

GET INSPIRED

Chalet Square Longplate Entrance Set
in Oil Rubbed Bronze

Five Distinct Lever Profiles
Charleston, Chalet, Federal, Villa and Haven, ranging from industrial-cylindrical to classical-curved for precise matching to any design narrative.

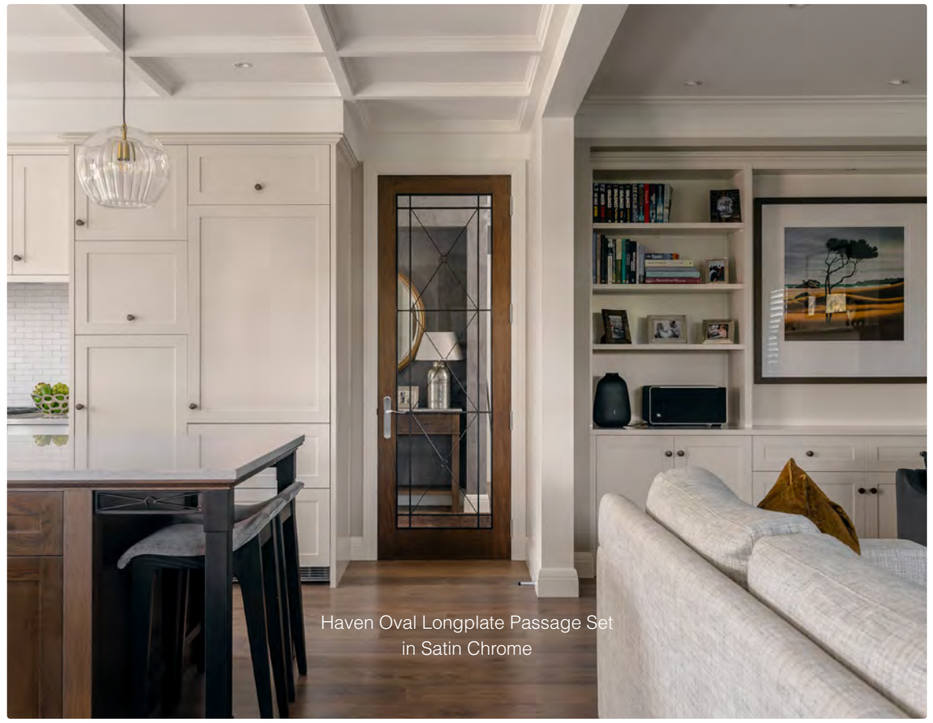
Crafted Finishes, Living Results
Choose from two stocked finishes or a curated selection of lacquered and living signature finishes, each one individually hand relieved. Living finishes develop a natural patina over time.

Most Configurable Range
Five lever designs across small rose, large rose, square, oval and traditional longplate, offering unmatched flexibility for any project.

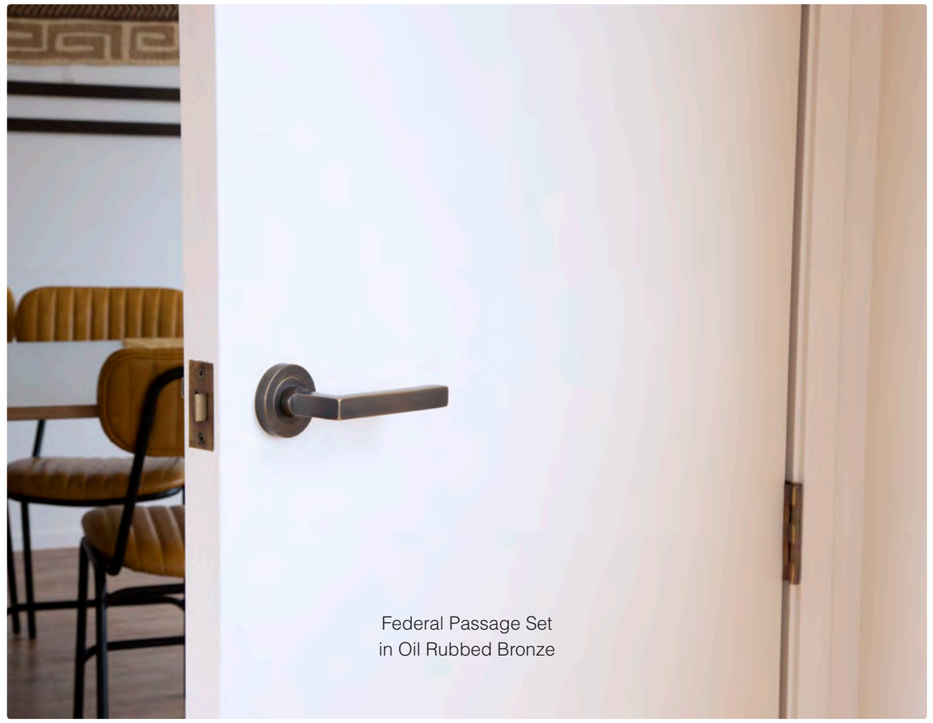
Large Rose Retrofit Option
The 64mm rose covers existing 54mm holes in doors, allowing Italian-grade hardware to be specified into any renovation project.

Material Provenance
Solid brass components sourced from Italy, finished and assembled in New Zealand by Windsor's specialist craftspeople.

Magnetic Latch Compatible
Upgrade any passage or privacy set to a magnetic latch for a fully flush door edge, quiet close and seamless finish from every angle.



Haven Oval Longplate Passage Set
in Satin Chrome



Federal Passage Set
in Oil Rubbed Bronze

PICK YOUR PROFILE

Charleston

The perpendicular cylindrical shapes evoke balance and harmony. Inspired by industrial detailing of metropolitan construction, a modern and sophisticated accent for any home.

Technical Information

CONSTRUCTION
Solid Brass

DRILLOUT
25mm - small rose
54mm - large rose

BACKSET
57mm backset - standard latches
60mm backset - magnetic latches

DOOR THICKNESSES
Suits door thicknesses of 32mm–50mm.
For thicker doors, longer cylinders, screws and spindles available to order.

LARGE ROSE
64mm Ø large rose option is ideal for retrofit but not compatible with mortice locks.

MAGNETIC LATCHES
Available with standard or magnetic latches. To upgrade any passage or separate privacy set to magnetic latches simply add an 'M' to the end of the existing 4 digit code.

KEYED ALIKE
Entrance sets can be ordered keyed alike, so multiple doors open using the same key. Simply request keyed alike when ordering more than one set.

USAGE
Suitable for both interior and exterior use (finish dependent).

HANDING
For single/dummy handles

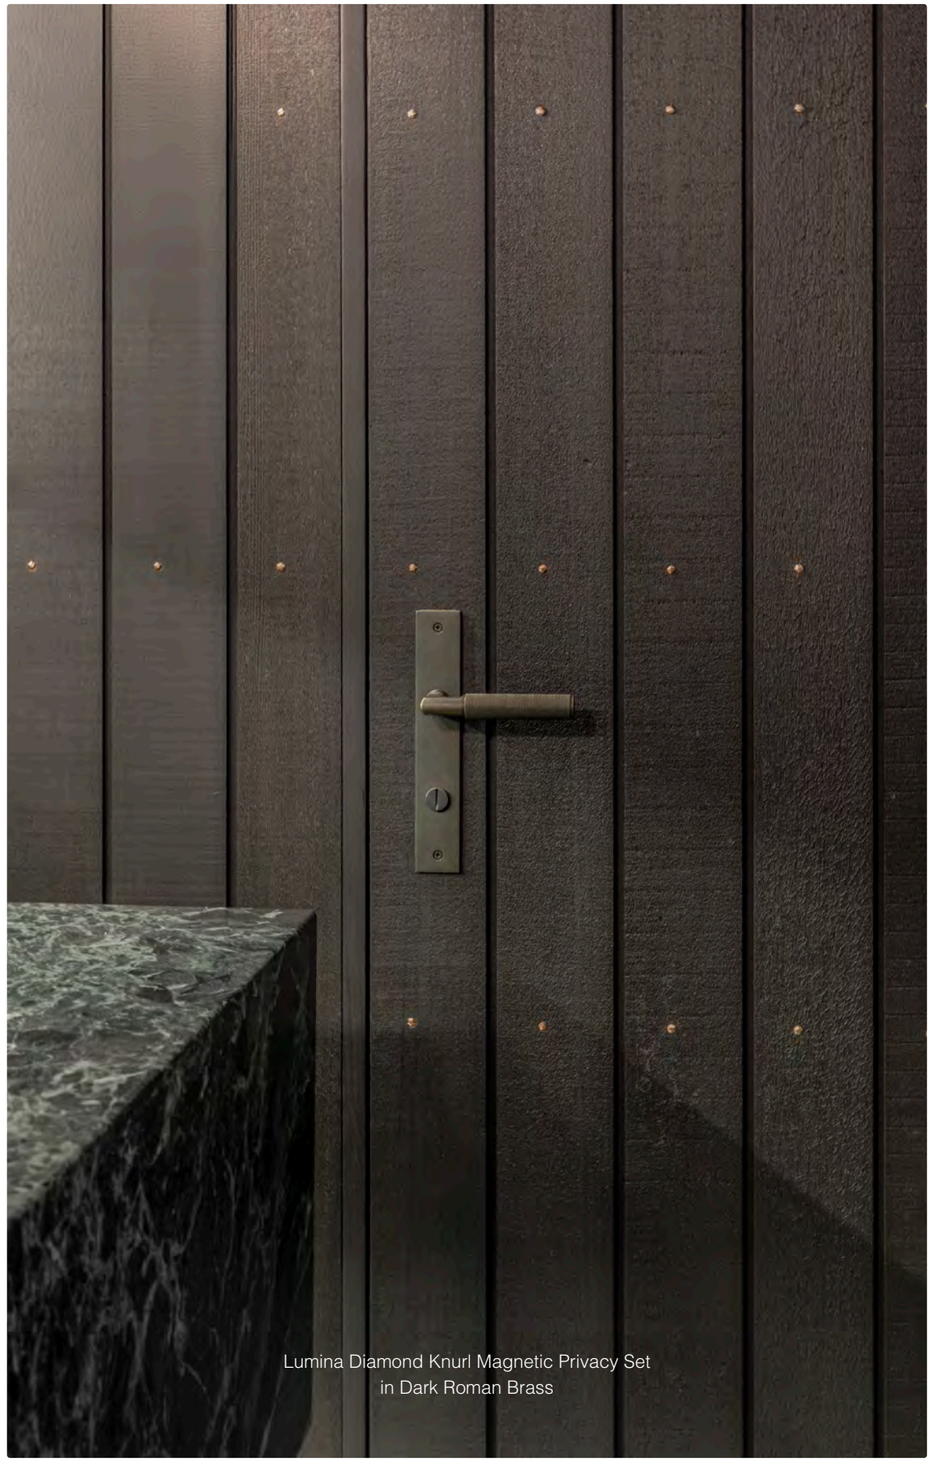
sensory experience.

Simplicity and complexity
unite in a harmonious fusion.

A natural evolution of
industrial elegance.



Lumina Diamond Knurl Magnetic Privacy Set
in Dark Roman Brass

Lumina Diamond Knurl Passage Set
in Oil Rubbed Bronze

GET INSPIRED

Texture as a Design Statement
Plain, diamond knurl or linear knurl options deliver a distinctive tactile experience, a design detail you can see and feel on every door.

Hidden Fixings, Clean Finish
Concealed rose fixings and blank longplate fixings deliver a minimal, uninterrupted look.

Solid Brass Construction
Precision-machined from solid brass for substantial weight, feel and durability on every door.

10 Finishes Including Living Options
Five stocked finishes plus five handcrafted living finishes that naturally patina over time, with coordinated accessories for a whole home finish.

Slim Rose or Longplate
A slim, low-profile rose and narrow longplate keep the hardware close to the door for a refined, minimal look.

Magnetic Latch Compatible
Upgrade any passage or privacy set to a magnetic latch for a fully flush door edge, silent close and seamless finish from every angle.

GET INSPIRED

York Euro Locking Set
in Satin Chrome

Heritage and Character Architecture
Door knobs are exclusive to Traditional across the Windsor portfolio. Choose from the Camden oval knob, Sutton round knob or York lever, each proportioned for colonial, villa and period homes.

Windsor's Broadest Finish Range
Four stocked finishes including the exclusive Vintage Bronze, plus 10 signature finishes, the widest finish offering across the entire Windsor portfolio.

3 Plate Configurations
Round rose, square or Victorian longplate to suit any door and home style.

Whole-Home Coordination
Matching window hardware and accessories allow every touchpoint to be specified from a single cohesive collection.

Solid Brass Construction
Forged and machined from premium solid brass for exceptional warmth, weight and long-lasting quality on every door.

Exclusive French Door Kit
The only Windsor range with a dedicated French Door Kit, a complete hardware solution for double door applications.

Technical Information

ULTRA-SMOOTH GLIDELOCK ACTION
Bearing-guided lock drive makes the snib smooth and effortless to operate.

DESIGN DETAILS
Installer-focused fitment for a professional finish. Smooth internal grip edge on Flush and Edge Pulls. 3mm protrusion across all functions to fit easily in all common cavities.

DESIGNED BY WINDSOR. ENGINEERED IN NZ
Purposeful design focused on feel, function, and longevity.

CONSTRUCTION
Heavy-duty Solid Brass, premium quality feel that lasts for years.

BACKSET
55mm backset standard

DOOR THICKNESSES
Passage Set and Edge Pull: 30mm minimum
Privacy/Latching Set: 35mm–65mm (66mm+ to order)
Locking Set: 35mm–58mm (59mm+ to order)

USAGE
Ideal for bathroom, bedroom, wardrobe, living, hallway, and exterior sliding and cavity doors. Compatible with timber, steel, and aluminium doors (adjustable aluminium strike available, code 5681 or 5683).

LOCKCASE DEPTH
68mm

FACEPLATE OPTION
Integrated Edge Pull or Blank Mortice Faceplate

Function

EDGE PULL
Single Edge Pull is placed on the end of a cavity door to enable a simple finger grip for pulling the door out of the cavity when open.

FLUSH PULL
Single Flush Pull is typically for a sliding door, commonly used on a wardrobe or internal sliding doors.

PASSAGE SET
Pull inside and outside. A passage set is designed for non-locking and non-latching cavity or sliding doors.

PRIVACY SET
Snib to lock inside, emergency release outside. Recommended to be used on bathroom sliding and cavity doors.

LATCHING SET
Snib inside and outside to latch door. Commonly used on interconnecting rooms, studies and walk-in robes.

LOCKING SET
Snib inside and outside to latch door, key inside and outside to lock door. Commonly used on external doors, office doors and house to garage doors.

Technical Information

The heavy duty and cam action closers handle doors up to 110kg with universal application and fire rated credentials. Exclusive to the heavy duty model, adjustable delayed action and adjustable back check allow closing speed and resistance to be tuned to the door.

The drop plate provides a discreet low profile mounting solution for doors where the standard aluminium framed door configuration is not suitable.

Note: Not suitable for hollow core doors.

Max. Door Weight
110kg - Heavy Duty
60kg - Cam Action

Power Size
EN2-5 - Heavy Duty
EN2-4 - Cam Action

Max. Door Width
1,250mm - Heavy Duty
950mm - Cam Action

Opening Angle

Technical Information

CONSTRUCTION
Solid Brass (excl. Minerva and Streamline)

DOOR THICKNESSES
Can be installed on cabinets from 12mm to 25mm (excluding 3mm mounting disc) and 12mm to 22mm (including mounting disc).

SCREWS
Brass Knobs, T-Bars and Handles come with M5×30mm screws.

The Minerva and Streamline handles come with M4×25mm screws.

USAGE
Suitable for all interior joinery including kitchens, bathrooms, cupboards and integrated fridges.

RETROFITTING
Cabinetry backing plates can be ordered separately to cover existing holes.

MOUNTING DISCS
Optional mounting discs included with all brass Cabinet Handles, T-Bars and Knobs. Projection will increase by 3mm when mounting discs are used.

GLOSSARY + ABBREVIATIONS

Glossary

BACKSET
Distance from front edge of the door to the centre of the handle spindle hole.

CYLINDER
A key barrel that is inserted through a mortice lock to drive the locking function. These can be keyed alike to have the same key throughout the house.

DESPRUNG
Refers to a lock body or handle that has had the springing tension reduced or removed.

DUMMY MOUNT
Small plate with a fixed spindle mounted to it to be used under a dummy handle to prevent it operating on the door.

ESCUTCHEONS
The housing or decorative plates that are mounted to a door around a cylinder or keyhole to cover up holes made in a door.

GRUBSCREW
Screw that tightens the handle to the spindle.

INTEGRATED PRIVACY SET
This is where the locking function is built into the handle rose, engaged by a privacy pin with an outside emergency release.

LEVER
Refers to the handle part that you grip with your hand.

MORTICE LOCK
The lock body that is inserted into the door, includes both the locking and latching functions in one.

REBATE KIT
A packer and striker system used between double doors at the point where the latch connects.

ROSE
Refers to the backplate part the handle mounts to. This encases the springs and point where the screws fix through.

SEPARATE PRIVACY SET
Refers to the privacy style where there is a separate turn and release set mounted above or below the handles on the door.

SPINDLE
The shaft that connects the two handles to each other through the door and drives the latch/lock mechanism.

STRIKER
Plate mounted in the door jamb that the door latch closes against.

THRU-FIXING
Screw fixing that bolts through the door, binding the two handles together.

TUBULAR LATCH
Refers to a tubular mechanism that is inserted in the door. This is the part that the handles operate to open and close the door.

HANDING FOR SINGLE/DUMMY HANDLES

FINISH COLLECTION

Stocked Finishes

BRUSHED NICKEL
Code: BN

Nickel electroplating is made up of several layers of colour then brushed and finished with a gloss clearcoat to protect the finish. Applied to brass, stainless steel, zinc alloy and aluminium dependent on the item.

MATT BLACK
Code: BLK

Matt Black is a bold finish and resembles a deep midnight tone. The finish is applied with electroplating, with some items powdercoated to achieve matching finishes across the range.

COCOA BRONZE
Code: CCB

A rich, dark finish with warm undertones that subtly blend deep brown and soft metallic hues. Its low-sheen surface offers a sense of understated luxury and sophisticated matt lustre.

GRAPHITE NICKEL
Code: GN

Graphite Nickel resembles tones similar to ‘gunmetal’ and offers a softer look than black whilst still adding texture and depth to a home.

MATT SATIN BRASS
Code: MSB

An elegant electroplated brushed brass finish that emits a soft luminous sheen.

SATIN ANODISED
Code: SA

A matt silver finish produced by a plating process typically applied to aluminium: the material is immersed in an electrolyte medium and a charge is applied so the finish adheres to it.

SATIN CHROME
Code: SC

Satin chrome is derived from a heavy chrome electroplate that is brushed back to achieve a consistent and seamless matt finish.

STAINLESS STEEL
Code: SS

Stainless Steel is a raw material finish, hard wearing and tends to be more resistant to scratching and marking than other finishes. The Windsor Stainless Steel colour is a consistent brushed look commonly referred to as satin stainless steel.

VINTAGE BRONZE
Code: VB

A dark bronze finish with warm chocolate depth and an aged heritage character. Sealed to hold its colour, it settles into traditional and period homes.

Scan here for more details on our finish collection.
These finish swatches are a guide only.

Signature Finishes - Lacquered

ANTIQUE BRONZE
Code: AB

A traditional bronze finish with shades of rich chocolate and protected with a gloss lacquer. Often used in heritage homes as it complements natural wooden doors and windows.

MATT SATIN BRASS
Code: MSB

An elegant brushed brass finish that emits a soft luminous sheen through the added matt lacquer.

POLISHED BRASS
Code: PB

A timeless classic, this mirror finish coordinates well with many other fixtures in the home and can appear traditional or modern depending on the lever style it is applied to.

Signature Finishes - Living Finishes

DARK ROMAN BRASS
Code: DRB

A smoky charcoal finish that after bronzing is rubbed back by hand to achieve lighter caramel edges that radiate through like twilight adding depth to your colour palette.

NATURAL BRONZE
Code: NB

Warm autumn hues that bring through texture similar to stone. This unlacquered finish is left to patina naturally over time.

OIL RUBBED BRONZE
Code: OR

This finish offers bronze tones varying from a dark truffle through to champagne by hand rubbing the hardware with oil to achieve the natural patina appearance.

ROMAN BRASS
Code: RB

A medium toned bronze finish that depicts shadows of dusk. It is rubbed back by hand and left to patina naturally over time.

RUMBLED BRASS
Code: RLB

Our most textured finish, this medium brass tone is favoured for its perfect imperfections.

UNLACQUERED BRASS
Code: UB

A luxurious golden colour with the same distinctive honey look as Polished Brass but non-lacquered. This is brass in its raw and natural form.

UNLACQUERED SATIN BRASS
Code: USB

This brushed brass finish is more subtle than its lacquered counterpart and offers a soft lustrous sheen that will age naturally.

FINISH CARE + DETAIL

Lead Times

We pride ourselves on fast, reliable lead times across our range, though on rare occasions delays outside our control may extend delivery.

STOCKED FINISHES
NZ: 1–2 Days **AU:** 7 Days

Delivery time applies to standard stocked products.

SIGNATURE + POWDERCOAT FINISHES
NZ: 14 Days **AU:** 21 Days

Delivery time applies to hand-finished and powdercoated products and made to order pull handles. Products and finishes in this category are non-returnable items.

Finish Match

- Use UB where RLB is not available.
- When using AB some accessories are Bronze PC to match.
- Use OR or CCB where VB is not available.
- Please refer to specific product information for PB lead times, as some items have 1–2 days delivery.
- All signature lacquered finishes cannot be used externally, including AB, MSB and PB.

Powdercoat Colours

Our Powdercoat Core Range brings together 22 of our most requested colours, along with the tones we use to match our brass finishes. The range stays fluid, and we review it regularly as trends and colour matches shift.

You can still powdercoat your chosen products in any colour across the Dulux Powder range. Any colour outside the Core Range carries a surcharge of $250 +GST.

Care + Maintenance

We recommend completing all painting or staining before fitting the door handles. Clean handles at least monthly to preserve the finish and maintain hygiene. Please avoid metal polishes, abrasive cleaners, scourers or rough cloths, and never spray or immerse hardware in liquid.

STOCKED FINISHES
To protect your hardware, clean the surface periodically with a warm, soapy, lightly dampened cloth to remove dust and grime, then dry thoroughly with a clean, soft cloth. Atmospheric conditions, salt, acids, caustic agents and construction dust can have the potential to cause discolouration to the surface.

STAINLESS STEEL
If tea staining appears, it can be restored with Blue Magic Metal Polish, code 5094. Apply a small amount to a cloth and rub along the grain until the area is clean, then wipe off with a clean cloth. Avoid coarse materials, as these can create inconsistent lines on the surface.

SIGNATURE FINISHES - LIVING
Living finishes are left in their natural state and will patina naturally with use. Clean periodically with a damp cloth to prevent buildup. Unlacquered Brass benefits from an occasional light coat of Windsor wax polish, while Oil Rubbed Bronze, Roman Brass and Dark Roman Brass benefit from a thin layer of olive oil (or similar), wiped on then buffed off with a clean cloth.

SIGNATURE FINISHES - LACQUERED
These finishes carry a protective resin lacquer for a gloss or matt look. Dust and grime can build up on the lacquer over time, weakening its integrity and leading to breakdown or discolouration, so it is best kept clean with a mild window cleaner and damp cloth. For light scratches on gloss finishes, an occasional application of Windsor wax polish helps restore the surface. These finishes are best kept indoors, as damage can lead to tarnishing.

POWDERCOAT
Dulux and Prismatic Powders offer powdercoating of products that is highly durable. To maintain the integrity of your powdercoated hardware, we recommend periodically cleaning the surface with a lightly dampened cloth and warm, soapy water to remove dust and grime that could lead to corrosion. After cleaning, dry thoroughly with a clean, soft cloth.

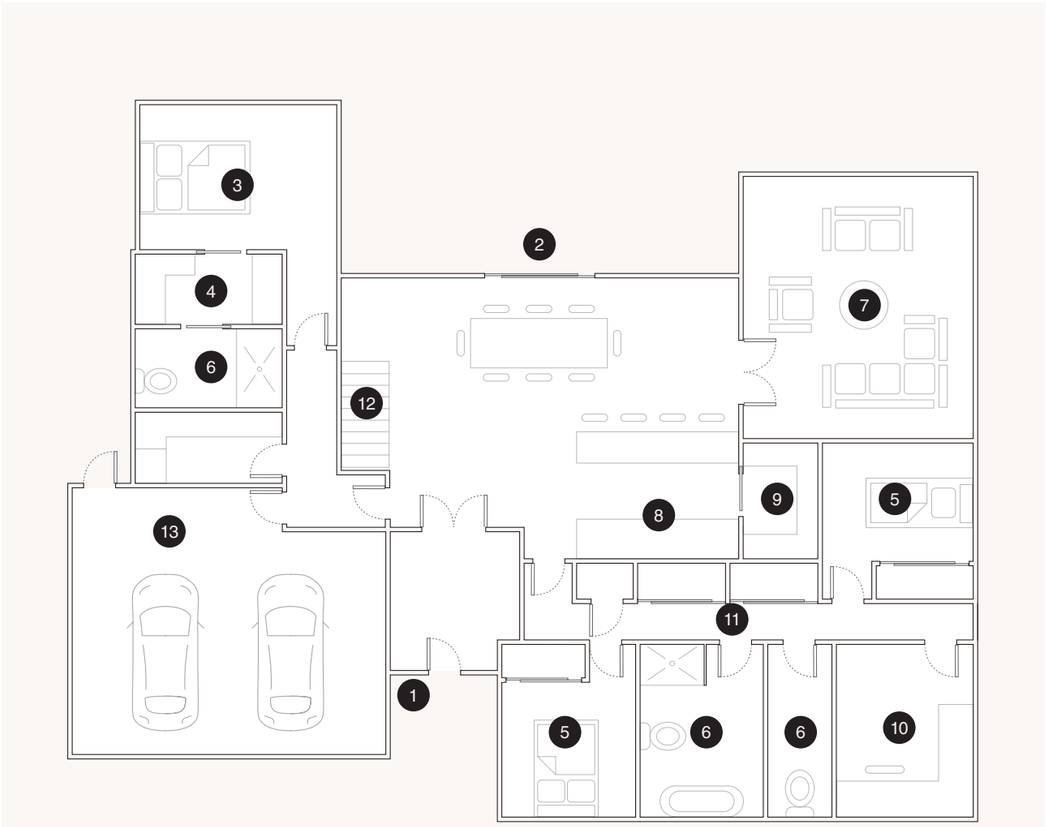
Terms + Conditions

- Products, specifications, finishes and lead times are subject to change without notice.
- Signature finishes on products may vary from colour swatches shown.
- A minimum quantity or extra surcharge may apply for some finishes.
- Special order, punched or modified products are non-returnable.
- Please check lead times for custom orders.
- Brass items can be supplied unlacquered (surcharge applies).

ROOM APPLICATION

Browse by room to discover the hardware solutions available for each space throughout the home, and choose what works best for your project or lifestyle.

Product Application by Room



1 ENTRANCE
- Pull Handle and Double Turn or Mini Lever Entrance Set
- Handle Entrance Set
- Floor Mount Doorstop

2 EXTERNAL SLIDING DOOR
- LUME – Locking Set

3 MASTER BEDROOM
- Passage Set or Privacy Set

4 MASTER WIR
- Cavity Suite – Passage Set
- Passage Set
- Dummy Lever + Magnets

5 BEDROOMS
- Passage Set
- Wardrobe – Flush Pull

6 BATHROOM/ENSUITE/WC
- Integrated or Separate Privacy Set
- Cavity Suite – Privacy Set

7 LOUNGE
- Interconnecting room double doors – Dummy Lever + Magnets
- Barn Sliders – Flush Pull + Pull Handle

8 KITCHEN
- Cabinet Handles

9 PANTRY
- Flush Pull

10 OFFICE
- Passage Set
- Cavity Suite – Locking Set

11 HALLWAY
- Passage Set
- Hallway Cupboard – Flush Pull or Dummy Lever + Magnets

12 STAIRWAY
- Stair Rail Brackets

13 GARAGE
- Deadbolt
- Entrance Set

Note: We recommend Skirting Mount Doorstop + Hinges with each hinged door.

PRODUCT CODE INDEX

A complete reference of all Windsor product codes, listed with their corresponding catalogue page numbers for quick and easy navigation throughout the range.
