

MATT BLACK

Finish Description

Matt Black is a bold finish and resembles a deep midnight tone. The finish is applied with electroplating, with some items powdercoated to achieve matching finishes across the range.

Care and Maintenance

- To protect your hardware, we suggest cleaning the surface periodically with a warm soapy lightly dampened cloth to remove any build-up of dust and grime that may cause corrosion and affect the integrity of the finish. Then simply dry thoroughly with a clean, soft cloth.
- Atmospheric conditions, salt deposits, acids, caustic agents, cement or dust on construction sites all have the potential to cause discolouration to the surface. Minimum of monthly cleaning of door handles is recommended for both finish preservation and general hygiene.
- Please avoid using any metal polishes, abrasive cleaners, scorers or rough cloths that may damage or scratch the hardware and do not spray or immerse the hardware in liquid to clean.
