

ROMAN BRASS

Finish Description

A medium toned bronze finish that depicts shadows of dusk. It is rubbed back by hand and left to patina naturally over time.

Care and Maintenance

- This range of handles is constructed from superior solid brass. Forged in Italy they arrive here at Windsor in their raw state to be processed and hand-finished by our in-house team of craftspeople. To create the different finishes, we use a variety of metal treatments, then the finish is relieved-back by hand, creating a series of natural patina finishes. Some finishes are left in their natural state to age over time, this is our living finish range, others are coated with a resin lacquer to protect the colour and provide either a high gloss or matt finish, these are our lacquered finishes. It is recommended that all painting or staining of the doors is completed prior to installation of the door handles.
- The living finishes will naturally patina over time with general use. As with all living and aging finishes, it is recommended to clean the surface periodically with a damp soapy cloth to remove any build up of dust and grime that may cause corrosion and affect the integrity of the finish.
- Roman Brass can be preserved by gently applying a thin oil layer to the surface from time to time. Wipe a thin layer of olive oil (or similar) over the handle then with a clean cloth wipe again to remove any excess on the surface.
