MADE TO ORDER

Where Function Meets Artistry —

At Windsor we believe that the smallest details make the biggest impact. Our Made to Order service offers a premium range of custom door hardware and accessories, crafted with precision and tailored to your unique vision.

Whether you're designing a contemporary masterpiece or restoring a heritage space, our bespoke pieces bring individuality and character that standard hardware options simply can't match.

Working closely with designers, architects, and builders across Australasia, we transform creative ideas into beautifully engineered hardware - from custom finishes and unique handle designs to fully personalised architectural statements. Each piece is a reflection of our commitment to craftsmanship, quality, and design excellence.

Choose Windsor's Made to Order collection and elevate your project with door hardware that's as unique as the space it belongs to.

When you want something truly special - create it.

Custom Process —

Consultation

Get in touch to schedule a consultation where we'll discuss your specific requirements - whether it's designing a bespoke piece* or customising one of our Made to Order products. This collaborative step ensures your hardware vision is clearly understood before we begin the design process.

Design Proposal Review

Once we've collaborated on your concept, you'll have the chance to review and approve detailed design drawings, typically delivered within 1–4 weeks depending on the scope.

A design deposit is often required, ranging from \$300-600 for simple projects to \$800-1,500 for more intricate or custom designs.

Material and Finish Selection

Select from a range of high-quality materials and finishes to tailor your Made to Order hardware to your desired aesthetic. We typically work with Solid Brass, Stainless Steel, and Aluminium, and offer a wide variety of powdercoat colours, bronze variations, and select PVD options for a truly personalised finish.

Quotation and Approvals

Once the design is approved, we'll provide a detailed quote including pricing and estimated lead time. Upon acceptance, your order will be confirmed and scheduled for production.

Prototyping

Prototyping is an optional step, offered based on the complexity of the design and your preference. We can provide 3D printed samples within approximately 2 weeks, with fully functioning prototypes available by discussion.

Production

Once approved, your custom hardware moves into production, where our skilled engineers bring the design to life with precision and care to meet exact specifications. Production lead times for Made to Order pieces start at 6 weeks from design sign-off and may extend depending on complexity.

Quality Assurance Check

Each handle undergoes a rigorous inspection process to ensure it aligns precisely with the approved design and meets our high standards of craftsmanship. Both technical specifications and finish quality are carefully reviewed before dispatch.

Delivery

Once completed, your custom hardware will be carefully packaged and promptly shipped to your specified location ready for installation.

Custom Process

^{*} Our bespoke hardware capabilities are typically built on existing platforms such as roses, spigots, plates, and pull handle legs. This allows us to create fully customised designs by adding unique details and features while maintaining structural integrity and functionality.

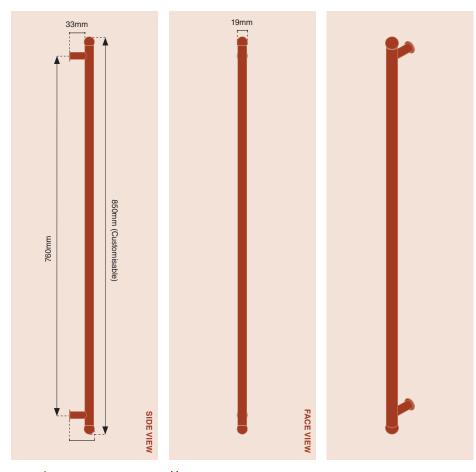

When he couldn't find the perfect pull handle for his own home, our founder engineered one himself, creating not just a handle, but the beginning of the Windsor legacy.

1984 Windsor original.

Eighty Four Pull

84001

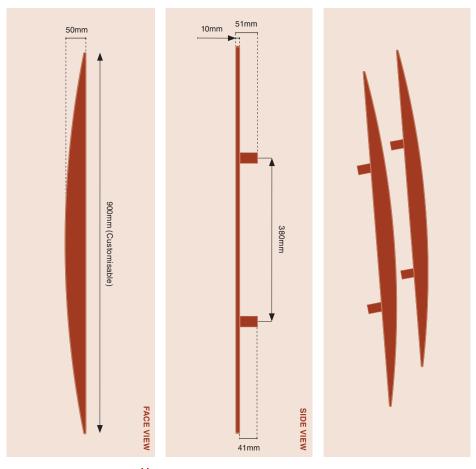

Specifications:

- > Can be used as an entrance handle or joinery pull
- > 600mm and 850mm standard lengths
- > Customisable length up to 1,000mm
- > Back to back pairs, face fix or fear fix options
- > Solid Brass

Eighty Four Pull Entrance Hardware

Crescent Pull

15001

Specifications:

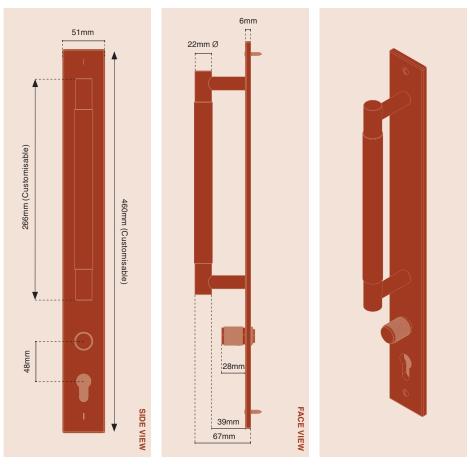

- > Can be used as an entrance handle or joinery pull
- > 600mm and 850mm standard lengths
- > Customisable length up to 1,000mm
- > Back to back pairs, face fix or fear fix options
- > Solid Brass

Crescent Pull Entrance Hardware

In-Plate Pull & Lock

15007 - Plain / 15008 - Linear Knurled

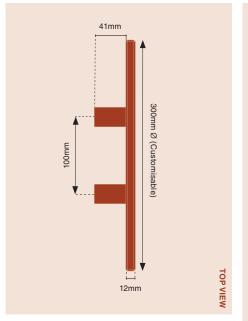

Specifications:

- > Linear Knurled or Plain handle and turn options
- > Euro 48 lockset for timber doors provided
- > 1170 Lock Kit provided (includes 1115 Mortice Lock with 57mm backset and 1148 Cylinder & Turn)
- > Handle length customisable up to 600mm
- > Plate length customisable up to 800mm
- > Back to back pair or face fix options
- > 22mm diameter handle
- > Mini lever optional instead of thumb turn
- > Solid Brass

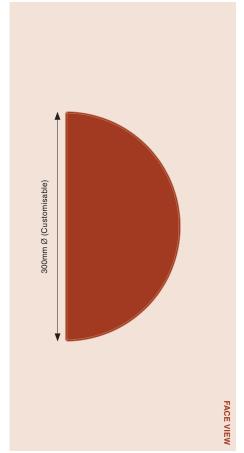

In-Plate Pull & Lock Entrance Hardware

Half Lunar Pull

15003

Specifications:

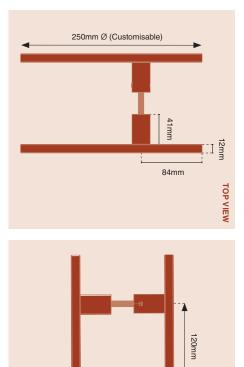

- > Back to back pairs or rear fix options
- > Customisable diameter up to 350mm
- > Solid Brass

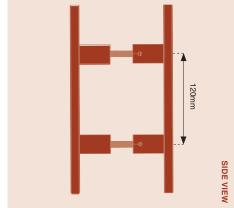

Half Lunar Pull Entrance Hardware

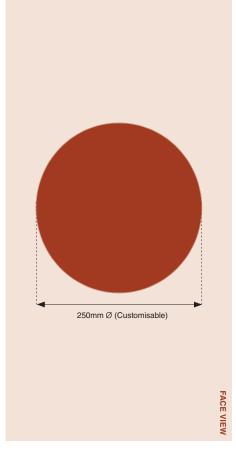

Full Lunar Pull

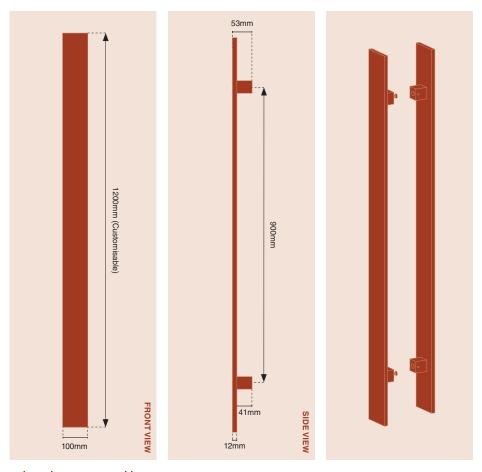

15004

Specifications:

- > Back to back pairs or rear fix options
- > Customisable diameter up to 350mm
- > Solid Brass

Full Lunar Pull Entrance Hardware

Flatline Pull

15005 - Plain

Specifications:

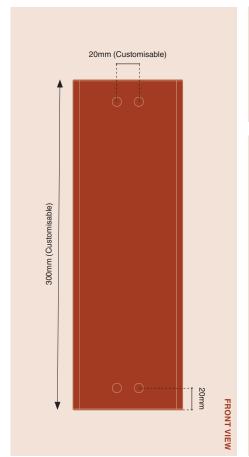

- > 600mm and 850mm standard lengths
- > Customisable length up to 1,000mm
- > Customisable width up to 100mm
- > Solid Brass

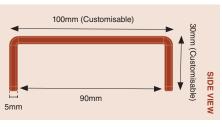

Flatline Pull Entrance Hardware

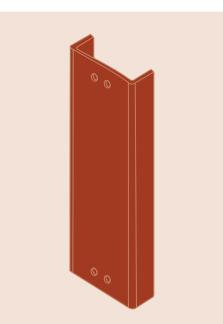

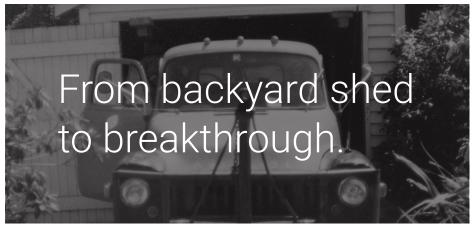

Double Lip Pull

15002

Specifications:

- > 300mm standard length
- > Customisable length up to 1000mm
- > Solid Brass or Stainless Steel
- > Suits door thicknesses 35mm-45mm (outside of this, product width needs to be adjusted)

Double Lip Pull Pivot Door Hardware

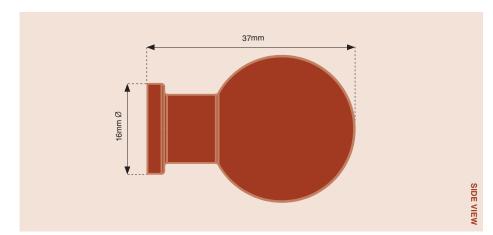

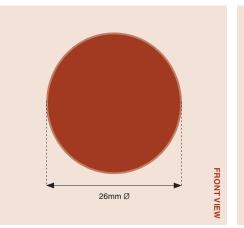

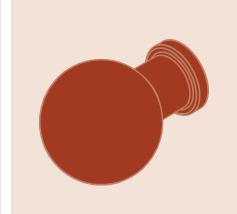

Hand-machined on a lathe after hours for local joiners, this first brass knob marked the moment Windsor's founder left his day job, opened our first commercial premises, and launched the debut range.

1984 Windsor original.

Eighty Four Joinery Knob

84002

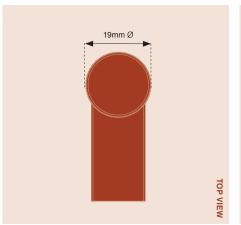

Specifications:

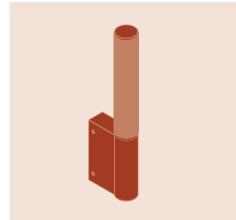

- > Original 1984 design
- > Solid Brass or Stainless Steel
- > 26mm Ø standard knob

Verge Coat Hook

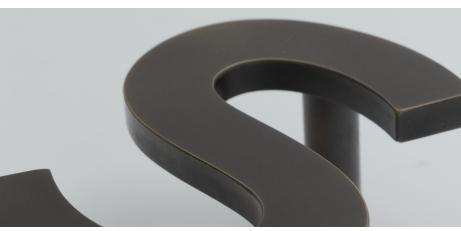

16102

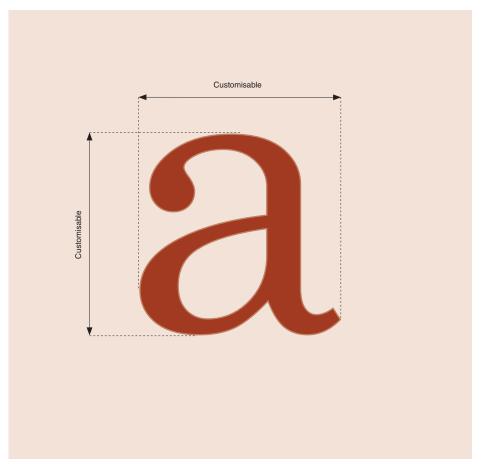

Specifications:

- > Can be used as coat hook or towel rail
- > Solid Brass or Stainless Steel
- > Customisable hook length
- > Linear Knurled or Plain handle option
- > Installed to wall with two heavy duty wall fixings

Verge Hook Coat Hooks

Lettering & Numbers

16101

Specifications:

- > Solid Brass or Stainless Steel
- > Supply font choice, size of lettering and chosen words/numbers
- > Infinite character count
- > Optional fixing choices (brass stand-off or flush glue fix)
- > Standard thickness with stand-off is 10mm. If you require a shallower thickness, it will need to be glue fixed.

Lettering & Numbers Accessories

Bespoke Hand Finishes —

Our signature collection of bespoke hand finishes has been honed over four decades of perfecting it's true artisan form.

They've always been a labour of love which began with dipping cabinet knobs in 20 litre buckets in the backyard to apply a lacquer and curing them in the family living room. Over time processes were refined, trends evolved and our collection grew.

Our hardware is forged and machined using the finest quality solid brass arriving at Windsor in a natural, raw state — a blank canvas ready to take on a new look.

To create the different finishes, we use a variety of metal treatments, then the finish is relieved-back by hand by our team of specialist craftspeople.

Some finishes are left in their natural state to age gracefully over time, these are our living finishes, others are coated with a resin lacquer to protect the colour and provide either a high gloss or matt finish, these are our lacquered finishes.

Door accessories, window hardware and pull handles are batch processed for precise colour coordination.

From our hands, to yours.

Antique Bronze —	A traditional bronze finish with shades of rich chocolate and protected with a gloss lacquer. Often used in heritage homes as complements natural wooden doors and windows.
Dark Roman Brass —	A smoky charcoal finish that after bronzing is rubbed back by hand to achieve lighter caramel edges that radiate through like twilight adding depth to your colour palette.
Matt Satin Brass —	An elegant brushed brass finish that emits a soft luminous sheen through the added matt lacquer.
Natural Bronze —	Warm autumn hues that bring through texture similar to stone. This unlacquered finish is left to patina naturally over time.
Oil Rubbed Bronze —	This finish offers bronze tones varying from a dark truffle through to champagne by hand rubbing the hardware with oil to achieve the natural patina appearance.
Polished Brass —	A timeless classic, this mirror finish coordinates well with many other fixtures in the home and can appear traditional or modern depending on the lever style it is applied to.
Roman Brass —	A medium toned bronze finish that depicts shadows of dusk. It is rubbed back by hand and left to patina naturally over time.
Unlacquered Brass —	A luxurious golden colour with the same distinctive honey look as Polished Brass but non-lacquered. This is brass in its raw and natural form.
Unlacquered Satin Brass —	This brushed brass finish is more subtle than its lacquered counterpart and offers a soft lustroussheen that will age naturally.

A Labour of Love —

Every piece we create carries with it the story of where we've come from —

A legacy of craftsmanship, innovation, and care.

With each finish meticulously crafted by hand, our hardware isn't just made, it's made to last, to be lived with, and to be loved for generations.

Choose Windsor's Made to Order collection and elevate your project with door hardware that's as unique as the space it belongs to.

Crafted with intent. Made to endure.
